QUALITY CONTROL MONITOR BUSINESS REQUIREMENTS SPECIFICATIONS

OVERVIEW

Product Description

Quality Control Monitor permits auditors to access the quality of clients' documents processed by case managers required to receive housing.

Product Scope

The Quality Control Monitor is intended to replace the outsourced web application with a HANO redesigned and redeveloped ASP/VB.Net web application.

The current application consist of the following business rules in relation to the four user types.

Business Rules

User Access Definitions

The following rules apply to administrators registering users:

1. An Admin must be an auditor and admin simultaneously.
2. An Admin should never be a staff member.
3. A Case Manager Supervisor can be an auditor and a staff.
4. A Case Manger can only be an auditor.
5. A Compliance Member can only be an auditor.

Case Manager

Staff (Auditee)

As a Case Manager, the following business rules apply:

1. Must be assigned to only one team.
2. Can only make corrections (change pending to complete) to their errors.
3. View their errors on the Review List.
4. Never perform a Quality Control Review.
5. Access to the Review List, Error Report and Statistical Report tabs.

Case Manager Supervisor

A Case Manager Supervisor can be both a staff member and an auditor.

Staff (Auditee)

1. A Case Manager Supervisor assumes the role of a Case Manager.

Auditor

While signed in as an auditor, the Case Manager Supervisor have the following business rules:

1. Perform a Quality Control Review on any case manager.
2. View and conduct an Error Report on any member of their team.

3. View and conduct a Statistical Report on any case manager.
4. View and conduct a Staff Report on any member of their team.
5. A Case Manager can edit and delete errors any member of their team

Compliance

Auditor

As an auditor, the Compliance member have the following business rules:

1. Perform a Quality Control Review on any case manager.
2. View and select clients from the Review List to edit/delete their file details regarding errors in both the Processing and Document tabs.
3. View, edit, delete and approve of error completion for any case manager on the Error Report.
4. View and conduct a Statistical Report
5. View and conduct a Staff Report

Administrator

An Administrator have the following business rules:

1. Perform a Quality Control Review on any case manager.
2. View and delete all Case Managers' errors from the Review List
3. View, edit, delete and approve of error completion for any case manager on the Error Report.
4. View and conduct a Statistical Report
5. View and conduct a Staff Report
6. View and modify users on the User Directory
7. Register a new user

APPLICATION OVERVIEW

I. Portals

Quality Control (QC) Review

A Quality Control Review permits an auditor to submit an assessment of accuracy for clients' documents obtained by Case Managers.

Review List

The Review List displays an itemize record of Case Managers' errors by individual clients.

Error Report

The Error Report displays each outstanding Case Manager's error by clients' names, comments, status and number of days processed.

Staff Report

Took too long to display

Statistical Report

The Statistical Report displays the stats of error occurrences during a time frame.

User Registration

Registration permits an admin to add a new user to the system with their name, email, password, team, and user classification. User classification is as follows auditee, auditor, admin and inactive.

User Directory

The User Directory lists all users in the system and permits admins to manage users.

II. Quality Control Review

The Quality Control Review comprises of two sections: Processing and Document.

File Details

To begin a Quality Control Review an auditor must input the client's *File Details*. A client's *File Details* consist of the following: first and last name, ID, name of staff who acquired the documents (usually the client's case manager, review date, action type, effective date and notes.

Action Type

Action Type is the form of submission an auditor is reviewing for, i.e. Leasing, Moves and Annual Reexamination.

Processing

The Processing Tab relates to the information needed to process a client. This tab consist of sub sections that an auditor must review in relation to the client's file. If the sub section does not contain any errors, an auditor must select "No errors" or "Not Applicable" for that particular sub section.

Document

The Document Tab requires for a case manager to have all of the documents needed to process a client based on a particular action type. Each sub section must have the "Reviewed" check box filled.

Complete Review

To complete a review, each Processing sub section must have either "No Errors" or "Not Applicable" selected and each Document sub section must have "Reviewed" selected. Lastly, select the Complete Review button and the auditor will be redirected to the Review List.

Errors

To add an error, the auditor must select the error type, Missing, Other or No Errors, followed by Details (a comment), staff name and error status. Once the previous items are completed, the auditor selects the Add Error button.

III. Review List

The Review List is a detail record board of each error by client. The record board permits auditors to select clients to view their quality control review. Each client record lists the number of total errors and the number of errors in each section. Auditors can filter the Review List utilizing a form to view their desired clients' information or by staff.

IV. Error Report

The Error Report lists the each individual error for all clients with errors grouped by the client name. It states the error, the error details, completion status and number of days the error was processed. The auditor can manage the error by changing its pending status to complete and modify its error details. In addition, the Error Report permits auditors to select clients to view their quality control review.

V. Staff Report

Took too long to display

VI. Statistical Report

The Statistical Report displays analytics for staff members in a specific time frame provided by the auditor to the form filter.

VII. User Registration

An admin can register and manage users. The admin registers a user by including:

- Name, Username & Password
- Deactivate user
- Group Type
- User classification (Staff , Auditor and/or Admin)
- Inactivity Status

A user that is inactive cannot log into the system.

VIII. User Directory

The User Directory lists the users in the system, displaying the users' name, username, group, type, admin and inactive status. An admin is the only user that can view and manage users from the user directory.

IX. Users

The Quality Control Monitor consists of four users:

- I. Case Managers
- II. Case Manager Supervisors
- III. Compliance
- IV. Administrator

The Case Manager Supervisors have two logins, one as an auditee, referred to as staff, and secondly as an auditor. To differentiate the user views as an auditee, the Case Manager Supervisor's username as an auditee must attach "staff" to the end of the name.

APPLICATION PROCESS

Quality Control Review

The Quality Control Review process for a new client leaving the waitlist is first, Eligibility and Screening and lastly, Leasing. For continuing clients, the following action (*review*) types are preformed: Interim Reexamination, Annual Reexamination, Moves, Port-In, Rent Reasonableness, and Selection from the Waitlist. Interim and Annual Reexamination are performed more than the other review types.

Modification of Error Pending to Completion

The Modification of Error Pending to Completion process for a case manager is to use the Review List to identify their errors inputted by the auditor and fix the client's file to ensure the error no longer exists. Next, the case manager changes their error from pending to complete. Lastly, the auditor reviews the client's file to check if the error was properly resolved and approves of the error completion. If the error was not accurately resolved by the case manager, the Error Report's Status will have a "D" meaning denied by the complete status. The Case Manager will have to fix

the error in the physical file, modify the notes and change the completion date to the new date the error was fixed. Then the auditor can approve of the error completion and the status will have an "A" for approved.

USER ACCESS CONTROL

Classification of Users	User Type	User Description	Function Privileges	Portal Privileges
Auditee	Case Manager	An individual that collects client's info and put into Elite	✓ View errors that are only assigned to their team members ✓ Change error status from pending to complete and comment for any errors on my team	<u>Review List</u> ✓ View only their errors as a Case Manager ▪ Change error from pending to complete <u>Error Report</u> ✓ View only their team errors and change error status from pending to complete
	Case Manager Supervisor	Assumes the role of case manager.	✓ View errors that are only assigned to their team members using the Review List ✓ Change error status from pending to complete and comment for any errors on my team	<u>Statistical Report</u> ✓ Can only run a report on one self and all members of their team. Cannot select a specific member of their team to run a report <u>Update User Info</u> ✓ Modify name, username and password ▪ Instructed only to edit password

Classification of Users	User	User Description	Function Privileges	Portal Privileges
Auditor	Compliance	An individual that accesses the accuracy of clients' documents retrieved by case managers.	✓ Conduct a Quality Control Review on any case manager ✓ View and conduct an Error Report on all teams ✓ View and conduct a Statistical Report on all teams ✓ Change error status from pending to complete for a Case Manager whom they performed a Quality Control Review ✓ Approve and/or Disapprove of completed Case Managers' error corrections whom they conducted a Quality Control Review ✓ Modify name, username and password ▪ Instructed only to edit password	<u>QC Review</u> ✓ Conduct QC on any Case Manager <u>Review List</u> ✓ View any case managers errors and view/edit the Quality Control Review File Details ✓ When an error is clicked, ability to modify pending to complete via the Edit Error form <u>Error Report</u> ✓ View all errors by anyone ✓ To approve of the error completion for any case manager, the auditor must select edit to update the error on the Error Report <u>Statistical Report</u> ✓ Perform a report on anyone <u>Staff Report</u> <i>Took long to display</i>
	Case Manager Supervisor	The supervisor of a team of case managers.	✓ Conduct a Quality Control Review on any case manager ✓ View and run an Error Report for their team ✓ View and run a Statistical Report on all teams ✓ Modify name, username and password ▪ Instructed only to edit password	<u>QC Review</u> ✓ Conduct QC on any Case Manager <u>Review List</u> ✓ View any case managers, but have to click on errors to edit/delete their specific team members' errors ✓ Cannot edit/delete other team case manager errors <u>Error Report</u> ✓ Only view and manage the errors of all members of their team but cannot view the Quality Control Review <u>Staff Report</u> <i>Took long to display</i> <u>Statistical Report</u> ✓ Perform a report on anyone

Classification of Users	User	User Description	Function Privileges	Portal Privileges
<i>Administrator</i>	Director or IT	An individual that has access to all features of the application.	✓ Conduct a Quality Control Review on everyone ✓ View and run an Error Report on all teams ✓ View and run a Statistical Report on all teams ✓ Manage users ✓ View User Directory	<u>QC Review</u> ✓ Conduct QC on any Case Manager <u>Review List</u> ✓ View itemized list of errors by any case manager ✓ Delete the file details based on an error <u>Error Report</u> ✓ View and manage (edit/delete) errors' grouped by clients. ✓ Edit error by approving error completion as well as other info <u>Statistical Report</u> ✓ View and filter stats on staff and errors <u>Add User</u> ✓ Register a new user with a name, username, password, user classification and active state <u>Staff Report</u> <i>Took long to display</i> <u>View Directory</u> ✓ View and manage all users <u>Update User Info</u> ✓ Modify name, username and password ▪ Instructed only to edit password

Test Users

The table contains the test users for the current Quality Control Monitor.

Name	Username	Password	Group	Classification
TEST Compliance	testComp	testComp	Compliance	Auditor
Jasmine Lewis	jalewis	jalewis	MIS	Auditor/Admin
TEST Case Manager	testCaseStaff	testCaseStaff	Case Manager	Staff
TEST Case Manager Auditor	testCaseAuditor	testCaseAuditor	Case Manager Supervisor	Auditor

IMPROVEMENTS

The current users and developer would like to implement the following improvements to better the user experience.

Tabs

Staff Report

Users would like to eliminate the Staff Report tab, since they are unable to use it and it does not have an impact on their work. The following tabs are required to complete their work: QC Review, Error Report, Review List and Statistical Report.

Action Types

Action Types to Maintain

The following action types used to conduct a Quality Control Review are needed:

Port In	Moves
Rent Reasonableness	Eligibility & Screening
Leasing	Annual Reexamination
Interim Reexamination	Selection form the Waitlist

Eligibility & Screening and Leasing

Reviewers would like to combine Eligibility & Screening with Leasing because both require many of the same documents.

Optional Fields until Leasing Component

- ☒ Payment Standard
- ☒ Utility Allowance
- ☒ Tenant Rent

Mandatory Fields for Eligibility & Screening

- ☒ Verification
- ☒ Calculation
- ☒ Occupancy

Fields Entered One Time

- ☒ Data Entry
- ☒ Other

Selection from the Waitlist

The following information must be added to this action type via the Processing tab:

- ☒ Lottery Number
 - Did client have lottery Number? Yes/No
 - If so, what is the number?
 - Comments
- ☒ Special Admission
 - Is a Special Admission? Yes/No
 - Comments
- ☒ Port In
 - Comments
- ☒ Other

Annual Reexamination

In the Annual Reexamination's sub tab "Master Documents", include these two sections Criminal Background Screening Request and Criminal Background Determination.

Port In

A Port In is when a client moves from another city/state to New Orleans.

Include all of the information on both the Processing and Document tabs in Leasing to Port In.

Reminders

To assist Case Managers, a notification will be sent to them by email once an auditor completes a Quality Control Review of their clients' file. Instead of users using a username to sign in they will use their HANO email address.

Warnings

In addition to having an error tool, reviewers would like a Warning Symbol to highlight items that would not be an error such as leaving out a client's middle initial.
